

Saved is Earned

A SMARTER APPROACH TO ENERGY EFFICIENCY

Metrus makes energy efficiency less complex with end-to-end services that cover the financing, implementation and maintenance of efficiency upgrades with no upfront cost.

Metrus enables projects to happen now. Companies who work with Metrus complete important energy saving projects in less time and reduce the risks of business interruptions that can occur with inefficient and outdated equipment.

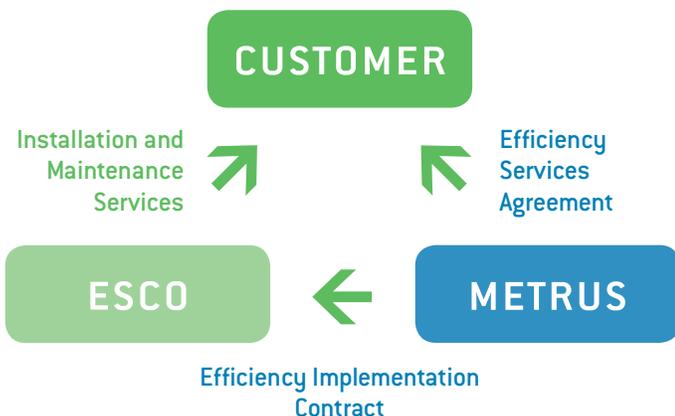

Metrus offers a smarter way to pay for energy efficiency. With Metrus funding 100% of project costs, you only pay for verified efficiency gains. Payments to Metrus are like paying a regular utility bill, except that you are using a portion of your current utility spending to pay for efficiency upgrades.

Working with Metrus is more than just a one-time transaction and Metrus delivers more than financing. We monitor the ongoing performance of your project, issue regular progress reports, and capture new opportunities for savings as they emerge.

Metrus partners with customers to develop and fund projects and works with ESCOs and energy management firms to construct and maintain projects. Close alignment with customers, ESCOs and other partners helps to maximize project benefits.

“With both financing and industry expertise, Metrus makes it easier for customers to achieve energy efficiency, save money and remove project risks. It’s an energy efficiency solution that’s been a long time coming.”

Dan Adler | President, California Clean Energy Fund

Metrus Helps You:

- Redirect current energy spending to pay for efficiency upgrades
- Deploy best practices and **proven technologies** with no upfront cost
- De-risk efficiency projects since you **only pay for achieved savings**
- Improve your **sustainability** scorecard without capital expenditure
- Ensure long-term equipment **reliability** with robust maintenance programs
- **Monitor and maximize your efficiency** improvements after installation

Case Study: BAE Systems

- Funded and implemented projects at multiple BAE System sites under Metrus' Efficiency Services Agreement (ESA)
- Metrus contracted with Siemens to implement and maintain projects
- The total impact of projects installed to-date include:
 - More than \$3 million in new efficiency improvements
 - \$500 thousand of annual savings
- Diversity of efficiency improvements installed include:
 - Heating, ventilation and air conditioning systems
 - Building controls & automation
 - Lighting upgrades

“BAE Systems is committed to mitigating the environmental impacts of our business by becoming increasingly energy efficient. Metrus helps make complex projects easy to fund and implement with minimal disruptions to our ongoing operations.”

Don Hill | Facilities Director, BAE Systems' Electronic Solutions Business
