

## **FEMP eTraining**

### ***Water Management Basics***

**1.5 Hours**

**0.2 CEUs**

**101 Level**

The U.S. Department of Energy (DOE) Federal Energy Management Program (FEMP) is pleased to launch the next FEMP eTraining Course: ***Water Management Basics***.

This course provides learners with a concise introduction to comprehensive water management, including key topic areas such as basic water management terminology, the history of federal water mandates, current Executive Order (E.O.) 13693 provisions, best practices associated with comprehensive water management, and proven water conservation financing mechanisms and strategies.

The three-module course offers a thorough overview of water management in the federal context:

- Module One: Introduction to Federal Water Management
- Module Two: Introduction to Comprehensive Water Management
- Module Three: Financing and Launching Water Management Projects.

The course also offers information about the most current resources and training opportunities for further education on water management.

The instructor for this seminar is Kate McMordie Stoughton, Water Efficiency Engineer at the Pacific Northwest National Laboratory (PNNL). Ms. Stoughton specializes in Federal water management, and currently leads the water efficiency team for PNNL.

By completing this course, learners will be able to:

- Identify new E. O. 13693 water efficiency provisions in six key areas
- Recognize water types and terminology, definitions, and applications
- Initiate comprehensive water management planning
- Consider your financing options to launch and pay for water management projects

After completing a course evaluation and multiple-choice assessment, learners will receive a certificate of completion and be eligible for continuing education units.

Participants will also be prepared to take additional courses in the *FEMP Water Management Certificate Series*:

- [FEMP06 Managing Water Assessment in Federal Facilities](#)
- [FEMP18 Best Practices for Comprehensive Water Management for Federal Facilities](#)

FEMP eTraining courses are designed for Federal energy and facility managers, but are open to all individuals at [femp.energy.gov/training](http://femp.energy.gov/training).

Courses are hosted in partnership with the National Institute of Building Sciences Whole Building Design Guide at [http://www.wbdg.org/education/femp\\_ce.php](http://www.wbdg.org/education/femp_ce.php).

Requires Google Chrome, Firefox 4.0+, Internet Explorer 7.0+ or Safari, and the Adobe Flash 9+ plugin.

For more information, visit the [FEMP Training](#) website.
